MaxLite Webinar Q&A: LED Parking, Garage, & Fuel Station Fixtures

Glenn Plasha: Are there additional rebates in the Philadelphia area for canopy lighting the Peco ones have expired Daniel Fatell from Ardmore, PA: I don't think there are any additional rebates in the Philadelphia area

Greg: You can always visit <http://www.maxlite.com/utilityrebates.html> for the latest rebate information concerning MaxLite products or call our office and inside sales can get the details you need.

Mark Pursell from Aptos, CA: Have design engineers begun considering scotopic lumens along with photopic lumens for specifying fixture replacements?

Greg: I have a good number who have, I have also met a few who consider Scotopic/Photopic ratio (S/P ratio) to be witchcraft. I think once the IES develops a formula the industry will adopt it at all levels.

Daniel Fatell from Ardmore, PA: relating to canopy fixtures, will MaxLite be producing any aesthetically pleasing surface mount (or recessed) LED canopy fixtures for shopping center canopies?

Greg: Our LED line continues to expand quickly particularly our outdoor offering. I think you will find more styles and finished available towards the end of the year.

Steve Rapisarda from Aquarius Supply: I thought this was an hour presentation?

Greg: We try to keep the presentations down to 20-30 minutes.

Cindy Campbell from St. Augustine: What is the cost of these fixtures?

Greg: Please contact your local rep or our office for product pricing.
