Thurs, Feb. 27 at 1pm EST To register click the "REGISTER NOW" button below

Add webinar to your Calendar (If prompted to OPEN or SAVE, choose OPEN)

#### **UTILITY SOLUTIONS**

#### **MAXLITE'S UTILITY SOLUTIONS TEAM**

#### **Core Mission:**

To provide utility rebate support to reps and customers to help drive incremental sales and find new opportunities for growth

## **UTILITY REBATE TRENDS:**

#### **UTILITY REBATE TRENDS**

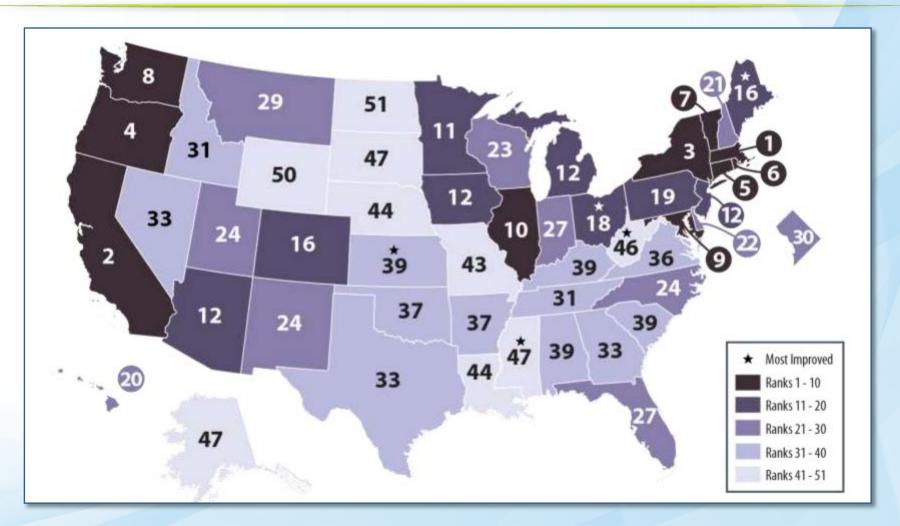

- Not all programs changed in 2014 depends on the timing of utility program filings
- Controls are becoming a much bigger part of programs sometimes they are required
- We are seeing an increase in rebate categories for LED
- \$'s per unit for LED products are flat to slightly down. As the product cost continues to decline, utilities will reduce the rebates per unit
- Budgets for LED programs continue to grow

#### **PROGRAM RANKINGS:**

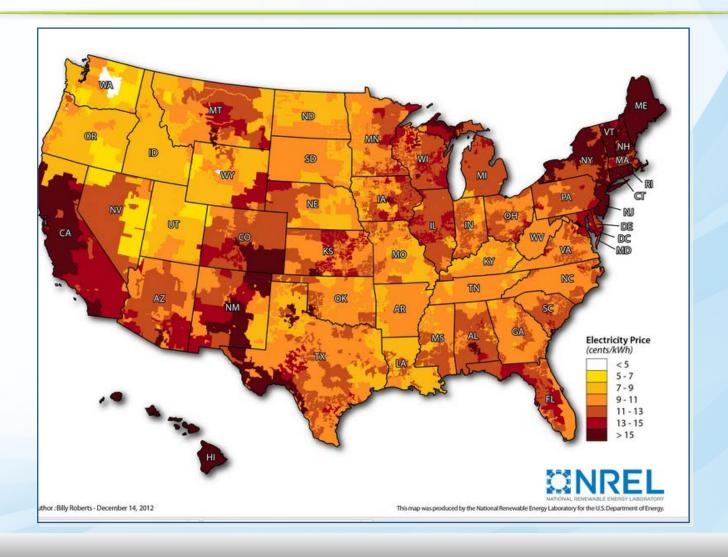

# ACEEE STATE EFFICIENCY PROGRAM RANKINGS

# ELECTRICITY RATE HEAT MAP

## **UTILITY REBATE TRENDS (CONTINUED)**

#### **UTILITY REBATE TRENDS**

- Utility rebates overall are growing rapidly 5 billion in rebates will be paid nationwide in '14
- Lighting upgrades are the most cost effective rebates for utilities
- Utilities are pushing for lifetime savings on LED projects
- Rebates are an easy way for your customers to increase
   ROI and shorten their payback period
- Utilize our MaxLite rebate paperwork service to gain new business with distribution and contractors

#### REBATE REFRESHER

- Prescriptive is simple.
  - 1 for 1 replacement for example, replace an old metal halide fixture and receive a set dollar amount to install a new LED fixture.
- Custom is more time consuming but can be more lucrative \$\$\$
  - Takes into account the actual energy saved by the new fixture and usually requires a bit more paperwork to be filled out.

#### **TYPES OF CUSTOM REBATES**

### **TYPES OF CUSTOM REBATES**

- \$ per watt reduced the difference between the old lighting input wattage and the new input wattage (for example, ComEd program pays \$0.50 per watt reduced.)
- \$ per kWh (kilowatt hour) reduced in the first year (estimated) this is the difference between the old annual kWh usage and the new (these range from \$0.06 0.18 per kWh.)
- \$ per kW (kilowatt) reduced the difference between the old and new kW – this removes the time element, just looks at the energy demand (these usually look like big rebates, sometimes paying as much as \$700 per kW reduced.)

#### **CUSTOM REBATE CALCULATIONS:**

#### **CUSTOM REBATE CALCULATION EXAMPLE**

#### 70W LED Wall Pack replacing a 250W Metal Halide

(Operating 12 hours per day = 4,380 per year)

250W - 70W = 180 saved watts 180W ÷ 1,000 = .18 kW saved .18kW \* 4,380 operating hours = 788 kWh saved (annually)

If the rebate pays \$0.15 per kWh saved (annual) it would total \$118 per fixture. (If the rebate was based on kW just remove the operating hours calculation.)

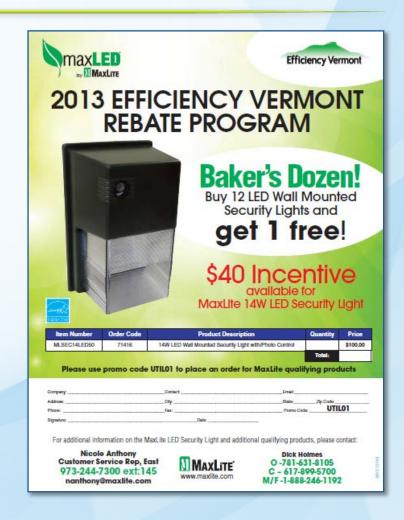

#### **KEY UTILITY OFFERINGS:**

#### **MAXLITE'S KEY UTILITY OFFERINGS**

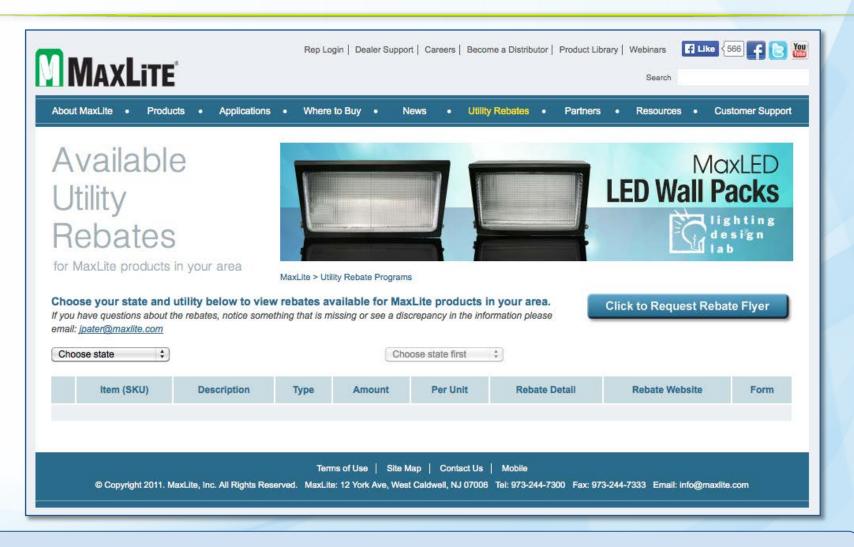

- C&I Rebate Finder
- Utility Rebate Flyers
- Custom Rebate Calculator
- DLC / ENERGY STAR / LDL
   Product Listings
- Utility Rebate Paperwork Service

#### FIND LOCAL UTILITY REBATES IN YOUR AREA

#### FIND LOCAL UTILITY REBATES IN YOUR AREA

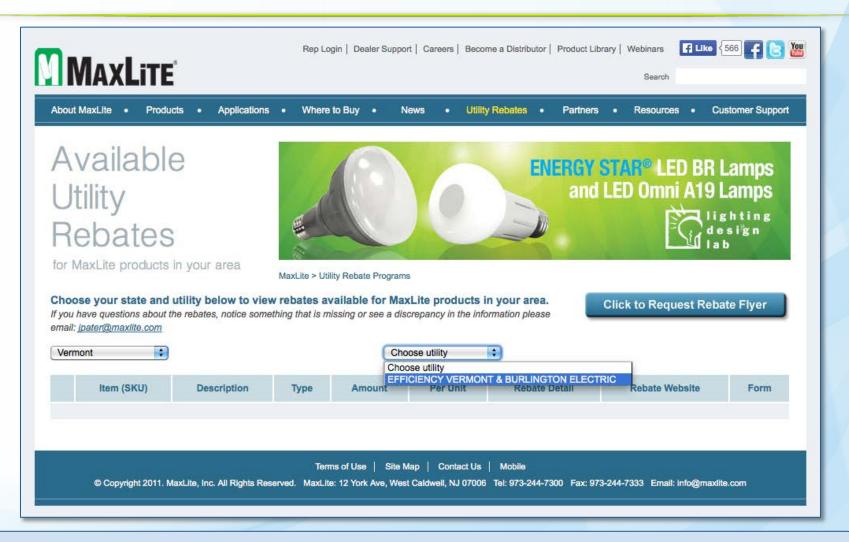

Choose your state from the menu (for this example we used Vermont.)

#### FIND LOCAL UTILITY REBATES IN YOUR AREA

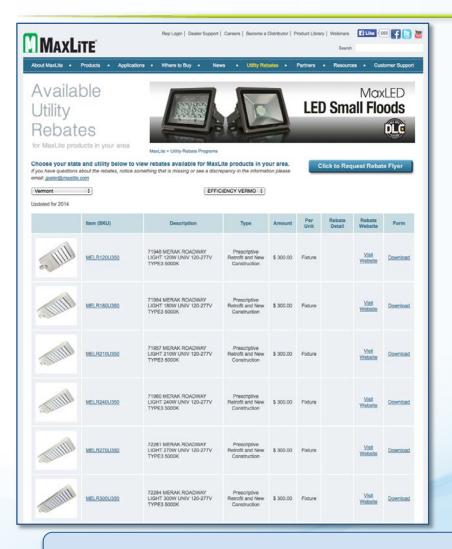

Choose your utility from the menu

#### FIND LOCAL UTILITY REBATES IN YOUR AREA

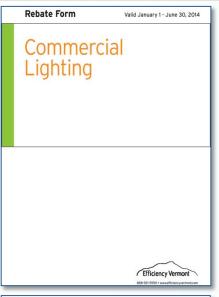

List of all available rebates will be displayed with website & form links.

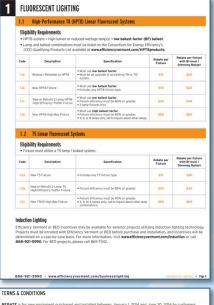

#### **UTILITY REBATE FORMS**

4.1 Interior Occupancy Controls				
Clighility Requirements  * For use on interior LCD or fluorescent.  **To reason of interior LCD or fluorescent.  **When used on fluorescent or opinional programs start builds and a sensor of daily of all least 10 minutes are recommended.  **Companion swatches for wireless sensors are not eligible for rebates.	Code	Type	Specification	Reba per Sens
	43a	Ceiling or Wall Remote Mounted Sensor	Hard-wired or wireless.     Minimum I75 watts controlled.	\$71
	4.00	Switch Mounted Sensor	Minimum 75 watts controlled.	530
	4.50	Fixture Mounted Sensor	Minimum 75 watts controlled.	530
	4.56	Refrigerated Case Sensor	Minimum 3 doors per sensor.	340
	4.50	Freezer Case Sensor	Minimum 3 doors per sensor.	941
4.2 Interior Daylight Controls				
Eligibility Requirements  For use on interior LED or fluorescent equipment.  To realize full energy savings potential, commissioning is recommended for daylight controls.	Code	Type	Specification	Reba per Sens
	4.20	Ceiling or Wall Remote Mounted	Minimum 75 watts controlled.	560
	4.2b	Switch or Fixture Mounted	Minimum 45 watts controlled.	\$30
4.3 Exterior Lighting Controls				
Eligibility Requirements  • For use on exterior LED or induction equipment.  • Lights must be turned off or reduced by at least 50% during unoccupied times.	Code	Туре	Specification	Reba per Sens
	4.30	Exterior Occupancy Sensor	Minimum 45 watts controlled.	\$40
<ul> <li>Occupancy sensors must be used in conjunction with costrols that prevent daytime operation.</li> <li>dvanced Lighting Controls</li> <li>fittiency Vermont or #ED incentives may be available rejects must be entrolled in Efficiency Vermont or rejects must be removed.</li> </ul>	or BED to	efore purchase on, visit www.effi	and installation, and incentive	

You can use the "Form Download" link to access the correct rebate form

#### **REBATE PAPERWORK SERVICE:**

#### MAXLITE'S REBATE PAPERWORK SERVICE

This service is not meant to replace any rebate paperwork service that your customers currently provide. We are not trying to disrupt their business – this is meant as a value add to bring in NEW MaxLite business for you with customers who aren't providing this level of rebate support.

#### **Process**

- 1. Project must have a majority of MaxLite product
- 2. Rep or Customer should make direct contact with me regarding project and spend 10 minutes walking through the details
- 3. We will need to know the customer location, type of customer, utility account numbers, current lighting products installed (retrofit or new construction) and the detail on new MaxLite product
- 4. Utility team will fill out the paperwork for the customer and submit to the utility
- 5. Funds will be paid to the customer not MaxLite

**ALL OF THIS IS FREE TO YOUR CUSTOMERS** 

#### **IDEAS FOR ENGAGEMENT**

#### **IDEAS FOR ENGAGEMENT**

- Introduce our paperwork service to customers who are looking to dive deeper into utility rebates.
- Selling or bid opportunities with local utilities MaxLite is an AESP member (Association for Energy Service Providers) – 2500 utility members.
- Marketing the utility rebates to your territories please reach out when you think a utility rebate / marketing flyer would help drive rebate sales.
- Engaging with your local utility to develop new program offerings for LED.

# MAXLITE LIGHTING & TECHNOLOGY UNIVERSITY

The department function is to train and provide product training material for all MaxLite representatives, customers and employees. The goal of the department is to educate the staff and rep network to a full and complete understanding of our products, technologies, marketplace, and business environments. We endeavor to educate how and why lighting functions, repair and replacement, as well as compare to competitors or listing requirements. We will accomplish this by providing the tools and services proactively and as needed to supplement.
