## Scalability

We know that, when it comes to lighting, one size does not fit all. The QuadroMAX fixture is scaled up or down according to your project needs, so you receive a fixture that is sized right for the wattage, the application and your budget.

*Equivalency dependant on current depreciation state and/or targeted light levels*

The QuadroMAX accommodates up to 160W of LEDs and three different NEMA distributions (Type III, IV, V) to create a custom solution for any application. In every configuration, the QuadroMAX delivers leading-edge efficacy of more than 110 lumens per watt.

## LED SMALL FLOOD FLS SERIES

See page 3 for dimensions

### PRODUCT DESCRIPTION:

The LED Small Floods are efficient, energy-saving replacements for metal halide and quartz halogen fixtures. Each luminaire features an integral listed driver, potted within a separate compartment to ensure cool operation and longer lifetime. The 15-, 20-, 40-, and 50-watt luminaires can mount at a broad range of angles with a yoke style arm and a 1/2" NPT threaded nipple.

### FEATURES:

- Replaces 100 watt quartz halogen through 250 watt metal halide lamps
- Up to 210,000-hour L70 lifetime, TM-21 standards @ 25°C
- Available with polycarbonate lens option
- Wide and Narrow beam distributions available
- Reflector reduces glare and improves appearance
- Compatible with mechanical relay type Photocell
- LM-79/80 reports available
- Sealed fixture is dirt and bug free
- 5 year warranty

### MOUNTING:

All models come standard with a yoke and a 1/2" NPT strain relief fitting for easy installation.

1/2" threaded nipple allows for easy installation to weather proof boxes or landscape mounting posts.

**Webinar Library**

**Our mission is to provide our representatives, customers and employees with a complete understanding of lighting technologies and the MaxLite product line.**

The MaxLite University Lighting Degree program offers three comprehensive courses in lighting fundamentals, ranging from beginner to advanced learning. All courses have been updated to include LED lighting education.

Whether you're a complete lighting novice or continuing your professional development, you are eligible to earn a certificate in our free online degree program. The courses are self-paced, but most lesson units can be completed in 30 minutes to an hour. You will receive a certificate upon completion of the program.

MaxLite University courses are currently eligible for the following continuing education units from the American Lighting Association:

MaxLite University has been updated for 2016! All three courses now include information on LED technology, fixtures, lamps, ENERGY STAR and other certifications.
