

# Welcome Vapor Tight & Utility Wraps in LED

---

July 25, 2013 Webinar

## Utility Wrap

The cost-effective LED Utility Wraps LS Series are energy efficient solutions that meet the latest building and safety codes in residential multi-family buildings, as well as parking garages, workshops, utility rooms, corridors, stairwells and other commercial applications.

The LED Utility Wraps are perfect energy saving replacements for less efficient fluorescent wrap-around fixtures. The thermal and lumen balanced LED engines approach provides substantial efficiencies using the latest technologies.

## Vapor Tight

Engineered for powerful lighting in a watertight enclosure used in high traffic installations, the IP66 rated LED Vapor Tight Linear Fixtures are designed to meet or exceed seven to 10 footcandles at eight-foot installed heights for parking drive lane compliance. The fixtures are designed as a replacement for fluorescent strip lights for use in carwash operations, airports, tunnels, maintenance areas, parking garages and stairwell lighting.

The LED Linear Fixtures use a vapor tight housing to protect the light source from water and dirt in harsh environments. The thermal and lumen-balanced LED engineering provides a cooler operation and greater energy savings based on new technologies. The fixtures are available in 2' and 4' sizes that use 20 to 45 watts.

## Vapor Tight LED 2' & 4'

### LED VAPOR TIGHT LINEAR FIXTURES LSV Series

A cost effective LED Vapor Tight Fixture features a full length polycarbonate lens and a one-piece white glass reinforced polyester (GRP) body. Designed to meet or exceed seven to 10 footcandles at 8' installed heights for parking drive lane compliance. The fixtures are ideal for utility lighting in parking garages and stairwells, meeting applicable building and safety codes.

PROJECT NAME

NOTES	
FIXTURE TYPE	ROOM SCHEDULE

#### FEATURES:

- Thermal/lumen balanced light engines
- Non-corrosive glass reinforced polyester (GRP) housing
- Stainless steel specification grade hasps and clips
- Non-occupancy dimming option avail.
- Back and end knockouts
- Low power consumption
- Ceiling or wall mounted
- IP66-rated with hermetic sealing
- White finish standard
- CRI: >83CRI

48" LED Vapor Tight

24" LED Vapor Tight

#### CONSTRUCTION:

- One piece glass reinforced polyester (GRP) body
- Milky white polycarbonate lens with inside ribbing
- Electrostatic paint steel chassis
- Universal voltage (120-277V)
- Class II driver

**Thermal/ lumen balanced light engines** – MaxLite engineered low drive rates allow cooler operating temperatures, which allows for less thermal heat sinking needed, and more, cooler and better performing LEDs that produce a higher lumen output.

# Vapor Tight LED Applications

# Vapor Tight LED 2' & 4'

## Features & Benefits

### **Durable lens**

Milky white polycarbonate lens with inside ribbing

### **Durable body**

One-piece, non-corrosive white glass reinforced polyester body protects the LED light source from water and dirt from vehicular traffic and natural elements

### **Parking drive lane safety and building code compliant**

Delivers seven to 10 footcandles from eight-foot installed heights to comply with parking drive lane safety and building codes

### **Thermal and lumen balanced light engines**

Enable cooler operating temperatures resulting in less thermal heat sinks, more LEDs performing better, increased lumen output and a more efficient operation

### **IP66-rated**

IP66-rated fixtures with hermetic sealing

### **Mount to surfaces or ceilings**

Surface- or ceiling-mounted to walls and ceilings for application variability

### **Color uniformity and even light distribution**

Constructed with LED chips with high-ranked binning that ensures color uniformity and produces accurate color rendering, even light distribution and minimal glare

### **50,000 hour life**

50,000-hour life, or more than 17 years operating 8 hours a day, is based on L70 standards (at 70 degrees F based on LM-80 data). When the LEDs reach 30 percent lumen depreciation, end-of-life is reached. This life cycle far exceeds halogen and CFL, and is almost double the life of linear fluorescents.

### **Universal voltage operation**

Operates on 120- to 277-volt systems

### **Buzz and flicker free**

While fluorescent fixtures can buzz and flicker, and may contribute to headaches and eye fatigue, the fixtures are constructed with LM80-rated LEDs and enable silent and flicker-free operation.

## Utility Wrap LED 2' & 4'

### LED Utility Wraps LSU Series

A cost effective LED Utility Wrap Fixture features a full length U Wrap Acrylic lens and a one-piece fabricated steel body. Designed to meet or exceed seven-10 footcandles at 8' installed heights for parking drive lane compliance, the fixtures are ideal for utility lighting in parking garages and stairwells, meeting applicable building and safety codes.

#### FEATURES:

- Thermal/lumen balanced light engines
- Steel construction
- Back and end knockouts
- Class II driver, with 0-10V dimming option avail.
- Low power consumption
- Can be ceiling or wall mounted
- For covered use only – damp rated
- Wire guard available
- White finish standard
- CR1: >83
- Optional occupancy sensor available

# Utility Wrap LED Applications

## Utility Wrap LED 2' & 4' Features & Benefits

### **One-piece steel housing**

Constructed with a white-finished, heavy gauge one-piece steel housing

### **Full length diffuser**

Full length U-Wrap prismatic acrylic diffusers for even light

### **Parking drive lane and stairwell compliance**

Deliver 10 to 20 footcandles from eight-foot ceilings for parking drive lane and stairwell compliance

### **Thermal and lumen balanced light engines**

Engineered with low LED low-forward voltage drive rates that enable cooler operating temperatures resulting in less thermal heat sinks, more LEDs performing better, increased lumen output and a more efficient operation

### **Damp-rated**

Damp-rated for covered environments

### **Mount to surfaces or ceilings**

Surface- or ceiling-mounted to walls and ceilings for application variability

### **Color uniformity and even light distribution**

Constructed with LED chips with high-ranked binning that ensures color uniformity and produces accurate color rendering, even light distribution and minimal glare

### **50,000 hour life**

50,000-hour life, or more than 17 years operating 8 hours a day, is based on L70 standards (at 70 degrees F based on LM-80 data). When the LEDs reach 30 percent lumen depreciation, end-of-life is reached. This life cycle far exceeds halogen and CFL, and is almost double the life of linear fluorescents.

### **Universal voltage operation**

Operates on 120- to 277-volt systems

### **Buzz and flicker free**

While fluorescent fixtures can buzz and flicker, and may contribute to headaches and eye fatigue, the LED Utility Wrap is constructed with LM-80-rated LEDs and enable silent and flicker-free operation.

# Vapor Tight Accessories

## OCCUPANCY SENSOR CONTROLS

Occupancy sensors detect indoor activity within a certain area. They provide convenience by turning lights on automatically when someone enters a room, and save energy by turning lights off soon after the last occupant has left the room. Occupancy sensors must be located where they will detect occupants or occupant activity in all parts of the room or area.

# ROI Calculator

## ROI Calculator

### Compare and Save

The easy-to-use ROI calculator will help you navigate through the switch to MaxLite's LED and other energy efficient lighting products for your retrofit project. Calculate the time to payback and savings over the life of your new lamp or fixture by filling in your existing and new MaxLite product and the corresponding application details.

If you have any questions or comments please email us. [Click Here](#)

## MaxLite Webinars

MaxLite has been hosting free webinars once per month on a variety of topics since 2010. A lot of great content has been presented, here's how to find it:

- To browse previous MaxLite Webinars, visit: <http://www.maxlite.com/webinar>
- Check/Subscribe to our YouTube channel

## Class Is In Session! 24/7

- Visit the MaxLite Lighting & Technology University at: <http://university.maxlite.com> to learn about all of MaxLite's products and gain access to many other lighting resources!

## QUESTIONS/ANSWERS

Thank you everyone for your attention! Please feel free to use this opportunity to ask any questions you may have about MaxLite or the products shown in this presentation.

FOR MORE INFORMATION ABOUT OTHER MAXLITE PRODUCTS, OR FOR LIGHTING QUESTIONS IN GENERAL; PLEASE CONTACT:
