## LED OUTDOOR LIGHTING OPTIONS

3/26/15 Webinar

Presented by: Bill Fenimore

## MAXLITE PRESENTS: LED OUTDOOR LIGHTING OPTIONS

### Topics:

- Why LED?
- Outdoor Fixtures Introduction
- MaxLite's LED Large Adjustable Wall Pack
- MaxLite's LED Small Adjustable Wall Pack
- LED VaporProof Jelly Jar Fixtures
- MaxLite Services
- Q&A

### MAXLITE PRESENTS: LED OUTDOOR LIGHTING OPTIONS

Adjustable, installation-friendly LED Wall Packs offer significant energy savings over metal halide fixtures and are perfect for lighting outdoor walkways, landscapes, parking areas, schools, hospitals, hotels, offices and other commercial spaces. Additionally, we will discuss the new LED VaporProof Jelly Jar fixtures which are designed to replace incandescent and CFL fixtures with high-quality, long-lasting LED illumination.

## WHY LED?

Why LED?

**LEDs offer a number of advantages over traditional light sources.**

**LEDs...**

- Offer 80% energy savings over incandescents.
- Contain no mercury, lead or other hazardous materials.
- Turn on instantly.
- Are dimmable.
- Last up to 100,000 hours (100 times more than an incandescent!).
- Do not emit ultraviolet or infrared rays during operation.
- Operate cooler.
- Do not burn out (they become dimmer after their lifetime).

## MAXLITE'S LINE OF OUTDOOR LED FIXTURES

MaxLite has an extensive line of outdoor LED fixtures, today we will focus on some of the features/benefits of the LED Adjustable Wall Packs and LED Jelly Jars.

**LED Wall Packs**  
Offered in WallMax and full cutoff models, MaxLite's line of LED Wall Packs are maintenance free and have a long life of 50,000 hours.

**LED Flood Lights**  
MaxLite offers small, standard and high output flood lights that were designed as efficient, energy-saving replacements for metal halide and high-pressure sodium lighting fixtures.

**LED Area and Roadway Light Fixtures**  
MaxLite's line of LED Area and Roadway Lights are the energy-saving replacements for metal halide and high pressure sodium lighting fixtures for a long life of 50,000 hours.

**LED Garage and Canopy Fixtures**  
Developed as energy efficient lighting solutions that promote safety and security in outdoor environments, MaxLite's line of Garage and Canopy Fixtures have a long life of 50,000 hours.

**LED Security Light Fixtures**  
MaxLite's ENERGY STAR®-qualified 14-watt MaxLED® Security Light Fixture with dusk-to-dawn (PhotoCell) provides optimal illumination for outdoor commercial and industrial environments.

**LED Vapor Tight Linear Fixtures**  
DesignLights Consortium (DLC)-qualified LED Vapor Tight Linear Fixtures are engineered for powerful lighting in harsh environments. A vapor tight housing protects the light source from water and dirt, while new generation LEDs and drivers provide higher efficiency and greater energy savings. The IP66-rated fixtures are designed to replace less-efficient fluorescent strip lights in car wash operations, airports, tunnels, maintenance areas, parking garages and stairwells.

**LED VaporProof Jelly Jar**  
LED VaporProof Jelly Jars are designed to replace incandescent and CFL fixtures with high-quality, long-lasting illumination over doorways, scaffolding, construction sites, fire hydrants and emergency call stations. The lamps are IP66 rated against ingress of dust and pressurized water in harsh environments, and suitable for inverted mounting.

## LED ADJUSTABLE WALL PACKS

### LED Adjustable Wall Packs

#### Overview:

Adjustable, installation-friendly LED Wall Packs are constructed with pivoting heads that aim light precisely, with chip-on-board LEDs to minimize glare and backlight. The durable, energy-saving fixtures are perfect for lighting outdoor walkways, landscapes, parking areas, schools, hospitals, hotels, offices and other commercial spaces.

#### Validations & Accolades:

- **Small (SAW) Adjustable Wall Packs - 13W, 26W**
- **Large (LAW) Adjustable Wall Packs - 74W**
- **Designed with sleek heat-sinking fins that extend the L70 to 120,000 hours.**
- **Efficacy for both fixture sizes exceeds 80 lm/W, translating to 75% energy savings over HID.**
- **Voltage-specific photo controls**

## Sleek and Flexy

### MaxLite's LED Adjustable Wall Packs

With architectural-grade design and installation-friendly features, it's easy to see what puts MaxLite's LED Adjustable Wall Packs ahead of the curve. Available in small and large sizes, they offer 75 percent energy savings over HID fixtures, making them a perfect replacement for lighting outdoor walkways, parking areas and other commercial spaces.

- Small (13W, 26W) and Large (74W) outputs; replace up to 250W metal halide
- Pivoting heads aim light precisely, minimizing glare and backlight
- Quick and easy to install - mounting hinges allow body to hang during wiring
- Optional photo controls power fixture on and off according to ambient light levels
- Minimal footprint works with any building design
- Exceptional long life: 120,000-hour expected L70 life, using TM-21 standards @25C

## LED LARGE ADJUSTABLE WALL PACK

PROJECT NAME: \_\_\_\_\_ CATALOG NUMBER: \_\_\_\_\_  
 NOTES: \_\_\_\_\_ FIXTURE SCHEDULE: \_\_\_\_\_

Page: 1 of 2

### LED LARGE ADJUSTABLE WALL PACK LAW74 SERIES

74W

#### PRODUCT DESCRIPTION:

With flexible installation features and architectural-grade design, LED Large Adjustable Wall Packs offer discreet, but powerful lighting for outdoor locations. The wall packs are constructed with a fixture head that pivots up to 120 degrees, to precisely aim light while minimizing glare and backlight. Wall packs are issued unscrewed, so they are ready to install right out of the box.

#### FEATURES:

- Fixture head pivots fully up to 120° from mounting plane
- Efficacy of 85 lm/W translates to as much as 70% energy savings over HID incumbents
- 70 CRI min
- Universal 120-277V power supply
- Power Factor > 0.9, THD < 25%
- 120,000-hour L70 lifetime, TM-21 standards @ 25°C
- 10kA surge protection standard

#### CONTROLS:

**120VAC/208-277VAC Photocontrol:** Voltage-specific photocontrols power the fixture when light levels reach 20 lux or below, and turn it off at 30 lux or higher. Operating temperature of -30°F-120°F. Photocell mounted externally.

#### CONSTRUCTION:

- Die-cast housing, durable powder coat finish
- Spirit level makes for an easy installation

## CASE STUDY: YMCA

### YMCA of Edwardsville, IL Upgrades Facility Lighting with MaxLite LED Fixtures and Lamps

160-watt LED BayMAX Pendant Highbays replaced 400-watt metal halide fixtures in the main pool area. (Scott Evers Photography)

*"Our members and guests have certainly noticed the improved lighting in our three facilities and appreciate it."*

*"The energy and maintenance savings of switching to LED lighting in our facilities is significant and will have a very positive impact on our operational budget for many years to come."*

— Gary Niebur, president/CEO of the Edwardsville, YMCA

More than 600 18-watt LED T8 lamps, 14-watt recessed downlight retrofits and 10- to 16-watt omnidirectional A-lamps were used to replace fluorescent and metal halide bulbs throughout the facility. (Scott Evers Photography)

After completing a successful lighting upgrade at its sister property, the Meyer Center, MaxLite and Cool City Lights were called upon to retrofit the YMCA of Edwardsville, Illinois ESIC Center and Early Childhood Development Center with energy-efficient LED lamps and luminaires.

The 45,000-square-foot ESIC Center was built in 1960 and since then, there have been several additions and renovations to the facility, which provides a wide range of activities for tens of thousands of youth, teens, adults and families to participate in each year. Recognizing the important role lighting plays in providing a safe and comfortable environment for its members, and realizing the cost-saving benefits of LED technology at the nearby Meyer Center, management decided to replace the ESIC Center's inefficient fluorescent, incandescent and metal halide fixtures with energy- and maintenance-saving LEDs.

Working with MaxLite, Cool City Lights of Glen Carbon, Illinois, developed a retrofit plan that would minimize the costs of new fixtures and maximize the ROI for the non-profit facility. A full range of MaxLite LED lamps and luminaires were chosen for the project based on lumen output, reliability, energy savings and overall cost-effectiveness. The products installed at the ESIC Center included T8 lamps, downlight retrofits, Vapor Tight linear fixtures, BayMAX Linear and Pendant Highbays, omnidirectional A-lamps, and exit signs.

By switching to LED, the ESIC Center will save more than 200,000 kWh and \$33,000 in energy and maintenance costs annually.

MaxLite®: 1-800-555-5629 | Fax: 973-244-7333 | Web: [www.maxlite.com](http://www.maxlite.com) | E-mail: [info@maxlite.com](mailto:info@maxlite.com)

160-watt LED BayMAX Linear Highbays replaced 400-watt metal halide fixtures in the gymnasium. (Scott Evers Photography)

The YMCA Early Childhood Development Center, a full day daycare for children from infancy to six years old in Glen Carbon, also received a lighting upgrade inside and out. MaxLite's T8 lamps were used to convert more than 100 fixtures in the daycare interior from fluorescent to LED light sources, while four ECO-T LED Recessed Troffers were added to the ceilings. The yellow-hued high pressure sodium wall packs on the exterior of the facility were replaced with LED Large Adjustable Wall Packs to give the center a more inviting presence, while the metal halide fixtures at the building's three entrances were exchanged with LED Canopy Fixtures.

50-watt LED Vapor Tight linear fixtures, specifically engineered for use in high-moisture areas, were installed in one of the facility's two pool areas. (Scott Evers Photography)

*"The ESIC YMCA LED installation went very smoothly. The new LED fixtures greatly updated this older facility. The quality of MaxLite's LEDs will enhance the ESIC YMCA and save energy for years to come."*

*"The Meyer Center is already saving an average of \$6,500 in energy costs monthly, and we expect the ESIC Center upgrade to not only improve lighting, but reduce electrical costs by more than 40 percent."*

— Richard Tallerico, president of Cool City Lights

The Early Childhood Development Center in Glen Carbon also received a complete lighting upgrade inside and out. (Scott Evers Photography)

#### MaxLite

MaxLite has been committed to providing energy efficient lighting products for more than 20 years, and was one of the first movers into LED technology in the industry. An ENERGY STAR® Partner of the Year, MaxLite established the MaxLED® brand, an extensive line of indoor and outdoor lighting fixtures featuring innovative LED luminaires and lamps using the latest state-of-the-art LED technology.

## LED JELLY JAR FIXTURES

### LED VaporProof Jelly Jar

#### Overview:

LED Vaporproof Jelly Jars are designed to replace incandescent and CFL fixtures with high-quality, long-lasting illumination over doorways, scaffolding, construction sites, fire hydrants and emergency call stations. The lamps are IP66 rated against ingress of dust and pressurized water in harsh environments, and suitable for inverted mounting.

#### Validations & Accolades:

Constructed with a shortened polycarbonate lens that minimizes light loss, Jelly Jars may be mounted at heights lower than the short-lived fixtures they replace for easier maintenance.

- Designed to replace incandescent and CFL fixtures.
- High-quality, long-lasting illumination over doorways, scaffolding, construction sites, fire hydrants and emergency call stations.
- IP66 rated against ingress of dust and pressurized water in harsh environments, and suitable for inverted mounting.
- Constructed with a shortened polycarbonate lens that minimizes light loss.
- Easy maintenance, mounting at heights lower than the short-lived fixtures they replace.

### LED VAPORPROOF JELLY JAR MLVP SERIES

Ceiling Mount

Wall Mount, with drop lens accessory

#### PRODUCT DESCRIPTION:

LED Vaporproof Jelly Jars are designed to replace 100-watt incandescent and 23-watt CFL fixtures with high-quality, long-lasting illumination over doorways, scaffolding, construction sites, fire hydrants and emergency call stations. The lamps are IP66 rated against ingress of dust and pressurized water in harsh environments, and suitable for inverted mounting. They have an L70 lifetime of 50,000 hours.

Constructed with a shortened polycarbonate lens that minimizes light loss, Jelly Jars may be mounted at heights lower than the short-lived fixtures they replace for easier maintenance.

#### FEATURES:

- Efficacy exceeding 80 lm/W allows replacement of 100W incandescent or 23W CFL
- Wide operating temperature of -30°F-104°F
- 70 CRI min
- Universal 120-277V power supply
- Power Factor > 0.9, THD < 25%
- Rated for 50,000-hour L70 lifetime at TM-21 standards, 25°C

#### CONSTRUCTION:

- Die-cast housing, durable powder coat finish
- IP66 rated
- Suitable for inverted mounting
- Multiple conduit entries for easy wiring
- Flat polycarbonate lens allows for lower mounting heights
