

**Questions & Answers from MaxLite's November 30th, 2016 Webinar:
"BayMax HL Series LED Linear High Bays"**

Q: For the LED Strip, how many units can be connected together?

A: 8ft only, two of the 4ft retrofit strips (RS Series LED Strip Retrofit Kit. The LS Series can not be connected together.

Q: What will replace the LSV2406SU30DV50

A: Next generation 2ft vapor tight will be LSV2U2050, datasheets will be released soon

Q: Any word on the release of the 4' and 8' strip light retrofit that was shared back in May?

A: The RS series mentioned in these slides is the 4' retrofit shown in May, as mentioned in the webinar it can be put end on end to make an 8ft version. The RS will be launched sometime end of December. If you are talking about the Lamp Ready Retrofit Strip, that is going to launch early 2017.

Q: Also, do you have any comparison sheet or info as to why use one highbay vs another in the line up?

A: Not yet but a comparison sheet between the various high bay products can be created.
