

MaxLite Webinars: MPulse Architectural-Grade Fixture Family – 10/26/17
Questions/Answers:

Q: Can the MPulse be mounted as an Uplight?

A: The wall mount is not rated for uplighting but as we develop the family and launch the small floods, those will be designed for uplighting applications.

Q: I recently tried to get a Type III in 4000K and was told it was not available. Will it be available as you develop this series further?

A: We can certainly get a Type III in 4000K in the wall mount. Please ask your MaxLite representative or contact Shenali Parikh @ sparikh@maxlite.com

Q: Will the BBU work down to -40° C?

A: 0 to 50°C is the range
