FAQs

What is the tariff, and how does it impact lighting customers?

On September 24, 2018, the Office of the United States Trade Representative (USTR) imposed an additional 10 percent duty on products from China, including components used in the manufacturing of energy-efficient lighting products. MaxLite is continuing to do everything it can to mitigate the effects of the tariff on its pricing.

What happens to product prices after December 31, 2018?

MaxLite is committed to holding current pricing levels through December 31, 2018. We will continue to evaluate the impacts of the tariff on our manufacturing process to determine what price adjustments need to be made. Lamps, tubes and the following product families manufactured in South Korea will not be impacted by the new tariffs: StaxMAX, ModMax, MPulse, QuadroMAX, HL and HP Series High Bays.

If I place an order before December 31, 2018 and delay delivery, am I still eligible for the price guarantee?

No. The price guarantee applies only to orders with immediate delivery. Pricing cannot be honored for future releases.

Can I receive my order in multiple shipments?

Yes, as long as each order is for immediate (not future) delivery.

Does the price guarantee include new product introductions?

Yes, it does! Take advantage of this limited-time offer to get the latest LED releases at a great price!

Does the price guarantee apply to container-direct shipments?

No, it does not. Please contact your MaxLite representative or customer relations manager to discuss container-direct shipments.
