MaxLite Announces Opening of New Headquarters in New Jersey
*Relocation positions company to drive collaboration
and strengthen 'ease of doing business' approach*

PINE BROOK, N.J. – February 23, 2023 – MaxLite, a leading innovator in the LED lighting industry for 30 years, announces that it has opened its new headquarters in Pine Brook, New Jersey. The building at 340 Changebridge Road includes new office space, a state-of-the-art training center and showroom, equipped with MaxLite’s energy efficient luminaires and c-Max Network lighting controls system.

“I’m delighted to welcome our employees, customers, distributors and agent partners to our new corporate headquarters,” said Spencer Bolgard, President and Chief Executive Officer. “This investment represents another step in our evolution as an industry innovator. It will drive collaboration, improve customer service and enhance the employee experience for our New Jersey-based teams. I’m also pleased to say it strengthens our ‘ease of doing business’ approach, which continues to be a focus throughout our company.”

The relocation is part of MaxLite’s plan to increase efficiencies, consolidate operations and better serve its agents, distributors and customers. The modern training center and showroom will allow the company and its partners to host educational events on its innovative portfolio such as c-Max Controls, and drive stronger relationships. The new Engineering and Testing Laboratory enables MaxLite to continue to maintain its recognized high standards of excellence in product engineering, design and innovation along with continuing to broaden its extensive patent portfolio.

As part of the move, the company also shifted its New Jersey warehouse operations to its state-of-the-art facility in Indiana. Opened last year, the 100,000 square foot Greenwood distribution and value add center will now serve regions previously served by the New Jersey location, in addition to its existing footprint. The company continues to expand its logistical capabilities with its rep partners in the Northeast and South-Central regions. This optimized distribution network now allows MaxLite to deliver product to the majority of its customers in a single day. With its improved inventory and value add capabilities, the company’s Anaheim, California facility provides superior service to the Pacific Northwest and Southwest regions. Anaheim also serves as the primary point of contact for shipments coming through Pacific ports.
