

MaxLite Filament Lamps Create Ambience & Energy Savings for Hotel

MaxLite[®]
A NEW WAVE OF LIGHT

CASE STUDY

“The owners requested LED for the energy cost savings, but all the lamps were designed to be exposed, so the look of the lamp was very important.

“The reaction to the MaxLite LED Filament lamps has been very positive. They resemble the incandescent style they were looking for, while providing significant energy savings.”

**- William J. Puhlman,
Ferry Electric Company**

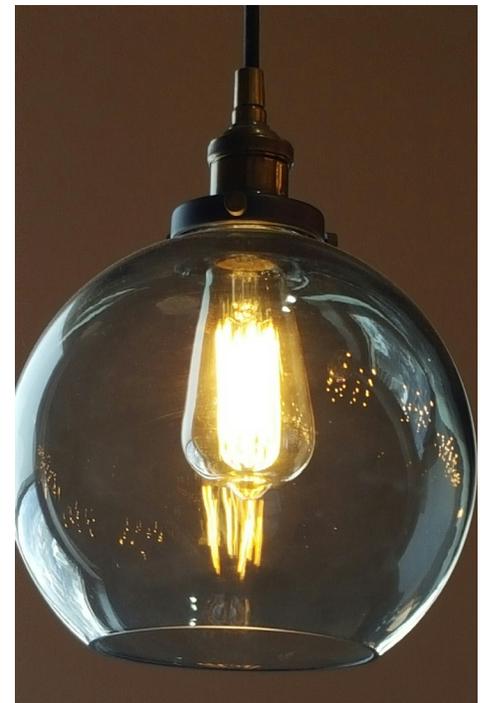

Situated in the heart of Pittsburgh, PA, the recently opened Embassy Suites by Hilton Pittsburgh Downtown houses Elevation restaurant, a modern American bistro with panoramic views of the city. Located on the 25th floor of the historic Henry W. Oliver Building, Elevation encompasses a casual yet elegant dining approach focused on comfort food. When it came time to choose lighting for the restaurant and bar, the hotel’s owners wanted to install energy-saving LEDs, but their interior design plans called for the vintage look of exposed incandescent bulbs.

MaxLite LED Filament Lamps were the perfect solution. The lamps replicate the nostalgic look and warmth of incandescent filament bulbs while providing 90 percent energy savings and a much longer lifetime of 15,000 hours. Recognized in the 2015 Lighting for Tomorrow competition, the lamps are designed with linear LED filaments that resemble their incandescent counterparts and deliver light in a super warm, 2200K color temperature.

A variety of decorative shapes, including globe, ST18, T14 and candelabra, were suspended in clusters from the ceiling to create a warm and inviting atmosphere that complemented the restaurant menu and the rich history of the building. Local contractor Ferry Electric Company performed the installation.

By installing LED filament lamps instead of incandescent, Embassy Suites by Hilton Pittsburgh Downtown is achieving the desired aesthetic at 90 percent energy savings.

MaxLite

MaxLite has been committed to providing energy efficient lighting products for more than 20 years, and was one of the first movers into LED technology in the industry. A four-time ENERGY STAR[®] Partner of the Year, MaxLite offers an extensive line of quality, certified indoor and outdoor LED lamps
