

New Jersey Hospital CEO Brings New Light to Office with Switch to MaxLite's LED Flat Panels

"After the long days I spent in my previous office with the old fluorescents, my eyes would be tired by the end of the day regardless of what I did. I wanted better quality lighting that would no longer strain my eyes when I moved into my new office, and these fixtures did the trick. When you stand outside the offices and compare the light, there is a night and day difference. The room now looks sun lit, warm and inviting."

-- Warren Geller, President & CEO
Englewood Hospital and
Medical Center

The Challenges

After a recent promotion from chief operating officer, Warren Geller, president and CEO of Englewood Hospital and Medical Center in Englewood, New Jersey, was transitioning to a new office space next to his current office. In addition to new furniture and revamped interior decorating, Mr. Geller chose to upgrade the lighting in his office to better quality and brighter LED alternatives.

The Solution

To get advice about lighting in his new office, Mr. Geller turned to long-time friend Yon Sung, president of MaxLite. In place of the five existing basket-type fluorescent troffers with two 32-watt lamps, Sung suggested Mr. Geller install the company's 60-watt 2'x4' Direct Lit LED Flat Panel Performance Series.

After the fixtures were installed in his new office, Mr. Geller's support staff asked if they, too, could have the LED products installed in their open office space to brighten it up. Mr. Geller agreed and six additional 2'x2' Direct Lit LED Flat Panels were installed, replacing six fixtures with two 32-watt fluorescent lamps each.

The Benefits

The quality of lighting is now vastly improved. The fixtures operate with fewer "hot" or "bright" spots, creating an evenly illuminated and glare-free space that is more appealing and user friendly for occupants.

Mr. Geller and his support staff said they are thrilled to have the brighter lighting that no longer causes headaches or eyestrain.

MaxLite

MaxLite has been committed to providing energy efficient lighting products for the last 20 years, and was one of the first movers into LED technology in the industry. An ENERGY STAR® Partner of the Year, MaxLite established the MaxLED® brand, an extensive line of indoor and outdoor lighting fixtures featuring innovative LED luminaires and lamps using the latest state-of-the-art LED technology.
